PLATFORM TRUCKS

STEEL DECK PLATFORM TRUCKS

Choose from a large selection of deck sizes and casters to suit any institutional and/or industrial application.

- Made of strong 14-gauge steel deck with a 2" folded bottom lip for extra strength
- Removable 1 1/4" tubular chrome handle can be inserted at either end of platform
- Two rigid and two swivel casters (assembly required, hardware is included)

CASTER WHEEL TYPES

Hi-Temp Nylon: Solid black nylon caster will not crush under heavy loads. Good for use on all types of surfaces from wood to concrete. Will tolerate temperatures from a low -28°C to a high of 230°C. Not affected by most corrosive chemicals.

Full Pneumatic: Air filled black rubber tire offers excellent shock absorbing properties. Smooth, quiet rolling over rough, uneven surfaces and outdoor terrain. Not recommended on floors with metal shavings or corrosive chemicals.

Mold-On Rubber: Molded rubber wheel bonded to a spoked cast iron core. The iron core gives it strength while the molded rubber provides easy, smooth and quiet rolling over rough terrain.

Non-Marking Rubber: Used for uneven surfaces and carpet areas. Its quiet rolling feature makes it ideal for both institutional and industrial applications. Will resist wet conditions and corrosive chemicals.

Polyolefin: Plastic wheel with high impact strength and non-chipping properties. Oil, grease and chemical resistant.

HEAVY-DUTY PLATFORM TRUCKS

WOOD DECK PLATFORM

- Sturdy 2" x 2" angle iron frame, with hardwood decking
- Ideal for carrying objects that scuff by metal to metal contact
- Steel frame absorbs shocks and handles uneven/heavy loads

ALL-STEEL PLATFORM

- Heavy 11-gauge, reinforced channel formed deck arc welded for maximum strength and long lasting rigidity
- Ideal for loads up to 2000 lbs.

CASTER PLACEMENT

- Available in standard-corner or diamond-tilt pattern
- Diamond tilt pattern allows the truck to tilt-balance slightly on the center side casters, allowing the truck to turn on its own length

Wood Deck

CASTER SELECTION:

To select the correct caster that is required for a specific application determine:

- 1) Platform size needed
- 2) Maximum load capacity it will carry
- 3) Type of floor surface it will roll on i.e., concrete, wood, tile etc...
- 4) Floor condition i.e., smooth, uneven, wet, chemicals, metal shavings, temperature etc.

RAIL DOCKBOARDS

Fixed Spanlocks

HOW TO ORDER:

1. Determine required capacity:

90% of gross weight for forklift trucks;
67% of gross weight for powered pallet trucks

Example:

Wt. of Forklift + Wt. of Heaviest Load =
Gross Weight x .90 = Required Capacity
5500 lbs. + 10,000 lbs. = 15500 x .90 = 13500 lbs.

2. Select dockboard width: Add 12" to width of equipment to be used on dockboard.

3. Determine height differential: The vertical distance from dock floor to truck floor.

Optional Forklift Handles

Must be ordered at same time as dockboard (factory installed)

DOCKBOARD/RAMP COMBINATION

For a height differential exceeding 11", use a ramp in combination with dockboard. Each board can be converted to an equivalent-size ramp. Call us with your requirements.

POLYETHYLENE DRUMS

UN-approved plastic drums are manufactured using state-of-the-art technologies to meet the stringent demands of chemical compatibility with hazardous and non-hazardous products as well as reliability and safety requirements. Drums are made from a high molecular weight, high-density polyethylene resin which makes them extremely strong and rigid, allowing for easy handling and low shipping cost. Plastic drums save warehouse space because they are stackable and can be stored outside without rusting. In addition, total packaging costs are decreased when they are reused.

Drums are manufactured in accordance with one of the following UN regulations:

- A) 1H1/Y1.9/150
- B) 1H2/Y250/S

NYLON SLINGS

All Uni-Web nylon slings are rated with a 5:1 design factor. Used in conjunction with overhead cranes, hoists or winches. Nylon slings are available in single or double ply to protect heavy, irregular sized loads from scratching or marring. Slings must be checked frequently. Should any surface area show signs of wear or cutting, the sling must be replaced immediately. Each is tagged with manufactured date and capacity.

TYPE 1 CHOKER SLINGS

- Forged alloy end fittings - triangle at one end, choker at the other
- Webbing forms a slip noose by slipping the triangle through the choker

TYPE 2 TRIANGLE SLINGS

- Forged alloy end fittings for single or double sling basket hitches
- Soft webbing conforms to the load shape without damaging painted or polished surfaces

TYPE 3 DOUBLE EYE SLINGS

- Commonly used as a basket and/or choker hitch
- For choker hitch pass one eye through the other flat eye, also makes for easy withdrawal from beneath loads

TYPE 4 TWISTED EYE SLINGS

- Twisted eyes make full functional contact with lifting hooks without the use of hardware
- Widely used for both choker and basket hitches

TYPE 5 ENDLESS SLINGS

- Most versatile and widely used sling
- The economical answer to most lifting problems
- Ideal for vertical, choker, and basket hitches
