

Emergency Eyewash & Shower Equipment

A GUIDE TO EMERGENCY EYEWASH & SHOWER EQUIPMENT

Emergency showers, eyewashes and tepid water delivery systems are required to provide emergency treatment in preventing permanent eye and skin damage from accidental exposure to chemicals, biohazards or airborne debris.

In the absence of a uniquely Canadian standard for the design and placement of emergency eyewash and shower equipment, provincial authorities in all jurisdictions in Canada refer to the ANSI Z358.1-2009 standard for recommendations and enforcement regarding emergency eyewash and shower requirements.

Emergency drenching fixtures must be readily accessible for use in manufacturing, laboratories, refineries, mines, construction sites and wherever workers may be accidentally splashed or sprayed with injurious solvents, acids, harmful particulates and, in some cases, biological hazards.

SEE PAGE 73 FOR MORE INFORMATION ON TEPID WATER DELIVERY SYSTEMS

KEY REQUIREMENTS FROM THE ANSI STANDARD Z358.1-2009 INCLUDE:

- Device must be positioned within 10 seconds (55') from hazard
- Device must be activated in one second or less
- Device must be capable of delivering minimum flow of flushing fluid for at least 15 minutes*
- Device must provide "tepid" water (16-38°C, 60-100°F)
- Device must be activated weekly to remove dust/debris
- There must be no obstruction in the pathway to the device
- The water supply uninterrupted at the valve
- Device must be identified with highly visible signage
- Device must be well lighted
- Device must be fully inspected annually

* Because of the limited quantity of fluid they contain, supplemental eyewash devices alone (such as bottled eyewash) cannot meet the 15 minute flushing requirements in the ANSI standard. These should be used for initial first aid only to treat a patient during the path to certified eyewash. You should never substitute a fully compliant eyewash station with supplemental devices.

Safety flushing devices are not a substitute for primary personal protective devices such as proper eyewear and clothing. Chemical MSDS' dictate proper first aid measures in case of accidental exposures.

Depending on site conditions and severity of the hazard, emergency eyewash and shower devices are found in various forms including:

- Plumbed-In
- Enclosed Safety Showers
- Portable
- Laboratory
- Tempering Systems
- Supplemental Devices

THE COMPLETE ANSI STANDARD IS AVAILABLE FROM:

International Safety Equipment Association

USA

Emergency Shower & Eyewash Equipment

Plumbed-in eyewash stations and showers are designed to direct a fixed water source to eyes, face or body in emergencies. Wall mount or pedestal-mounted eyewash stations and eye/face washes should be located nearest the point of need but no more than 10 seconds (55') from the hazard.

HALO™ WALL MOUNT EYEWASH STATIONS

- Features antimicrobial protection, integral strainers, and rugged safety-yellow powder coat paint for easy visual identification in an emergency
- Aquaduct™ self-draining design eliminates bacteria growth from standing fluid
- Eye/face wash models provide industry leading 85% facial coverage
- Activate by push handle or by lifting dust cover
- Eyewash models feature unique flip open dust caps
- Optional see-through dust cover (shown) makes inspection simple and keeps device free of debris and ready for use
- Stainless steel models are ideal for corrosive, high abuse environments
- Wheelchair accessible
- Arrives fully assembled
- ULC certified to ANSI standard Z358.1-2009

SEB798

SEB795

HALO™ PEDESTAL MOUNT EYEWASH STATIONS

- Pedestal safety eyewash fixtures are ideal where wall mount is not practical, and allow placement closest to point-of-need
- Features antimicrobial protection, integral strainers, and rugged safety-yellow powder coat paint for easy visual identification in an emergency
- Aquaduct™ self-draining design eliminates bacteria growth from standing fluid
- Eye/face wash models provides industry leading 85% facial coverage
- Activate by push handle or by lifting dust cover
- Eyewash models feature unique flip open dust caps
- Optional see-through dust cover (shown) makes inspection simple and keeps device free of debris and ready for use
- Stainless steel models are ideal for corrosive, high abuse environments
- Arrives fully assembled
- Wheelchair accessible
- ULC certified to ANSI standard Z358.1-2009

IMPORTANT:

Regulations require tepid water (18-37°C). See page 73 for water tempering devices

Combination showers and eyewash fixtures pair-up eyewash with emergency showers when the MSDS calls for both eye and skin irrigation. To accommodate various site conditions, combination units provide several options including: Stainless components, PVC, foot-treadle operation, anti-scald or anti-freeze valves and freeze-protected heat trace units.

HALO™ COMBINATION SHOWER & EYEWASH STATIONS

- Combine Halo™ eyewash technology with SpinTec™ shower features for high performance safety installations
- SpinTec™ showers yield superior fluid distribution
- Durable ABS plastic showerhead
- Compact profile means less in-plant damage
- Features antimicrobial protection, integral strainers, and rugged safety-yellow powder coat paint
- Aquaduct™ self-draining design eliminates bacteria growth from standing fluid

HEAT-TRACED COMBINATION EMERGENCY SHOWER & EYE/FACE WASH STATIONS

- Hydrodynamic shower design produces equal flow distribution
- Features Axion MSR™ components
- 120 VAC cable-heated
- Perfect for extreme weather conditions dropping down to -30°F
- Solid stainless steel pipe stanchion and galvanized fittings offer durability and corrosive-resistance
- Universal design allows for top or bottom water supply
- Unit is pre-built and fully water/pressure tested to reduce installation time
- Certified by CSA to meet the ANSI standard Z358.1-2009

Order No. SEB261
Mfg. No. 8317CTFP

Emergency Shower & Eyewash Equipment

Laboratory, Faucet-Mounted and Swing-Away Eyewash and Shower Fixtures are uniquely designed for indoor environments where space is at a premium, including healthcare, university, and the QC lab. Product solutions include swing-activated units, faucet-mounted eyewash stations, and combination fixtures: all designed to provide the safest possible lab environment.

FAUCET-MOUNT EYEWASH STATIONS

- Cost effective solution for applications with an existing faucet
- Now lead free
- Mounts to standard or gooseneck type faucets
- Twin spray heads include a flow control and pop-off dust covers
- One-step activation
- Activated by an actuator pin on adapter when pin is in closed position, faucet can be used for normal operation
- Includes a safety sign and inspection tag
- Weight: 1 lb.
- SEI certified to ANSI standard Z358.1-2009

Bradley

Order No. **SAK621**
Mfg. No. S19-200B

SWING-ACTIVATED EYEWASH STATIONS

- Swing-activated eye and eye/face wash stations mount to a counter or a wall
- Swing-over unit mounts to a counter only
- 90° swivel activates eyewash over sink to begin flow of water to cleanse eyes
- Stows neatly to side of sink when not in use to save space
- Twin spray heads include a flow control and pop-off dust covers
- Include a safety sign and inspection tag
- SEI certified to ANSI standard Z358.1-2009

Emergency Shower & Eyewash Equipment

Water Tempering Products are designed to meet ANSI standard Z358.1-2009 requirements to deliver "tepid" water to injured workers. In addition to discouraging use of a safety flushing device, a 15-minute deluge of cold water to the injured worker can negatively affect core body temperature, and hypothermia can result. Therefore, ANSI standard Z358.1-2009 requires emergency showers and eyewash stations to deliver "tepid" water. ANSI defines "tepid" water as 15.6°C to 38°C (60-100°F). Tempering solutions include steam, instantaneous (on demand) heaters and thermostatic mixing valves (TMV's). TMV's blend hot and cold water to meet strictly specified water temperature ranges.

THERMOSTATIC MIXING VALVES

- Blend hot and cold water to a comfortable flushing temperature
- Reliable liquid-filled thermostat with a 10-year manufacturer's warranty
- Check stops on inlets
- Adjustable set point within temperature range
- Accurate temperature control to within $\pm 3^{\circ}\text{F}$
- Built-in cold water bypass, assuring cold flow
- Easy installation and serviceability
- Positive shut-off of hot supply when cold supply is lost
- Dirt and lime resistant
- Dial thermometer
- Factory assembled and tested
- Universal mounting capability
- Rough bronze finish
- SEI certified to ANSI standard Z358.1-2009
- Temperature adjustment are vandal resistant

Emergency Shower & Eyewash Equipment

Portable Eyewash Stations provide self-contained fluid where plumbed water is not available. Gravity-fed or pressurized portable eyewash systems should deliver the ANSI minimum 15-minute safety eyewash drench. To keep water stored in these portable systems safe for ophthalmic use, an antibacterial agent is included or available separately. These units often can be freeze protected for outdoor applications.

ON-SITE® GRAVITY-FED EYEWASH STATIONS

- Ideal for locations where a plumbed water source is not available
- High-visibility yellow, molded pedestal and tank
- Transparent tank allows solution level to be checked easily
- Hinged eyewash tray activates in one quick motion
- Stainless steel clamps secure the tank during transport
- Vandal-resistant unit: foreign objects cannot be introduced into tank because all openings are sealed once the tank is installed
- One of the lightest portable eyewash stations on the market
- SEI certified to ANSI standard Z358.1-2009
- Includes wall bracket (can also deck mount)

ON-SITE® WASTE CARTS

- High-visibility yellow
- Captures used fluid, 56-gallon capacity
- Tapered sump, easy to drain

ON-SITE® HEATER JACKETS

- Protects against freezing: down to -23.3°C (-10°F)
- Insulated heater jacket conceals a 121 W heater
- Secondary thermostat prevents overheating if primary thermostat fails
- Requires 120 V AC line
- All UL-listed components

9-GALLON PORTABLE EYEWASH STATIONS

- 9-gallon high density green polyethylene tank made from FDA compliant materials
- Gravity-fed to supply a continuous flow of water for 15 minutes at 0.4 GPM
- Easy-to-operate yellow activation arm protects eyewash spouts when not in use
- Wide-fill opening with threaded cap allows easy inspection, cleaning and filling
- Light design and mounting bracket (included) make relocation simple
- Optional sterile bacteriostatic additive, which permits storage of the water for up to three months
- Freeze-protected version **SEI815** ideal for remote low traffic areas where protective measures are still needed and ambient temperature could drop below freezing
- Certified by CSA to meet ANSI standard Z358.1-2009

PORTA STREAM® II & III EYEWASH STATIONS

- Versatile portability and 15-minutes of uninterrupted flushing - without costly plumbing
- Simple installation and operation
- Features a nozzle strap that is easily removed to activate flushing, leaving hands free to hold eyelids open
- Can be easily and affordably placed near most workplace hazards with single bracket mounting device or transported with optional universal cart or universal stand
- Molded handle accepts hanging bracket for vertical or horizontal surface installation
- Versatile flushing fluid options include Eyesaline® - a preserved, buffered, saline solution superior to tap water for emergency eye care and water additive
- Large 16-gallon (60.5 L) capacity
- Porta Stream® III is electrically heated thermostatically to 72°F
- SEI certified to meet ANSI standard Z358.1-2009

Emergency Shower & Eyewash Equipment

10-GALLON PORTABLE/PRESSURISED EYEWASH STATIONS

- Stainless steel pressure tanks include tire filler valve with 0-100 PSI air gauge, pressure relief valve to prevent over pressurization and built-in carry handles for easy transportation
- Eyewash assembly includes twin eyewash heads with a flow control and pop-off dust covers
- Eyewash activated by a large stainless steel push handle with stay-open ball valve
- 8' drench hose with hand-held squeeze valve
- Optional 4-wheel, stainless steel cart
- SEI Certified to ANSI Z358.1-2009

10-GALLON UNIT:

- Eyewash flow: Minimum 15-minute water flow
- Drench hose flow: 3 1/2-minute water flow

15-GALLON UNIT:

- Eyewash flow: Minimum 22-minute water flow
- Drench hose flow: 5-minute water flow

HEATED UNITS:

- 510 watt heater
- Maintain average water temperature at 75°F (24°C)
- Secondary thermostat prevents overheating
- UL-listed components
- Plug into 120-volt AC line, GFCI recommended

Emergency Shower & Eyewash Equipment

Supplemental Eyewash includes bottled eyewash and other devices that do not meet 15-minute drench criteria. These supplemental solutions are designed to treat nuisance hazards and/or as an initial first aid to injured workers during the path to certified eyewash, but they do not meet the 15 minute drench criteria of the ANSI standard Z358.1-2009. Bottled eyewash is designed to be positioned close to the point of need. Acceptable for immediate first-aid, bottled eyewash should support, but not substitute, a primary eyewash or shower unit.

SALINE EYEWASH BOTTLES

- Contains a buffered saline solution that is sterile and superior to tap water for emergency eye care
- Blow-Fill-Seal (BFS) bottle is tamper resistant, and maintains the sterility and integrity of the eyewash
- Easy to remove and open in emergency situations
- 1, 4, and 8 oz. bottles have user controlled delivery, delivering drops or an irrigating stream of solution, depending on the squeeze pressure applied to the bottle
- Trilingual instructions (English, French and Spanish)
- Does not meet ANSI standard Z358.1-2009 15-minute flushing requirement

SALINE EYEWASH WALL STATIONS

- Holds bottle firmly in place while allowing easy access in an emergency
- Mounts to wall with provided screws
- Integral overhand protects bottles from dust and debris
- Durable plastic is easy to clean
- Simple, highly visible operating instructions are provided on each unit
- Bottle contains a buffered saline solution that is sterile and superior to tap water for emergency eye care
- Blow-Fill-Seal (BFS) bottle is tamper resistant, and maintains the sterility and integrity of the eyewash
- Delivers drops or an irrigating stream of solution, depending on the squeeze pressure applied to the bottle
- Trilingual instructions (English, French and Spanish)
- Does not meet ANSI standard Z358.1-2009 15-minute flushing requirement

OCCUPATIONAL HEALTH AND SAFETY REGULATION FIRST AID KITS

Occupational first aid kits meet regulations required by federal, provincial and territorial jurisdictions. For more information regarding federal and provincial first aid regulations, please visit the websites listed on the following pages. Regulations change on a continuing basis. Requirements vary from jurisdiction to jurisdiction and are dependent on a number of factors including (but not limited to):

- Maximum number of employees at the work site (or per shift)
- Location of the place of employment/industry
- Type of industry and potential hazards
- Proximity or travel time to a medical facility

FEDERAL REGULATION FIRST AID KITS

Common federal employers include the following interprovincial and international industries:

- Banks
- Railways, highway and air transport
- Ferries, tunnels, bridges and canals
- Telephone and telegraph systems
- Pipelines
- Radio and television broadcasting and cable systems
- Shipping and shipping services
- Employment in the operation of ships, trains and aircraft
- Licensed grain elevators, and certain feed mills and feed warehouses, flour mills and grain seed clearing warehouses, flour mills and grain seed clearing plants
- Federal public service and persons employed by the public service and Crown corporation and agencies
- Indian reserves
- Exploration and development of petroleum on lands subject to federal jurisdiction
