ZORB-IT™ SPONGE NITRILE PALM COATED GLOVES

- Zorb-IT™'s unique, patent-pending "sponge nitrile" technology is changing the rules of what a flat-dip nitrile glove can be
- The sponge nitrile produces an extra-absorbent nitrile dip that conforms and adheres to the nylon shell like no other glove
- Beats the competition in laundering nearly three-to-one, and absorbs almost twice as much oil and grease while still delivering a sure grip
- Stands up to repeated washing with no shrinkage
- Accepted for use in Canadian food processing facilities
- Made of FDA compliant materials

Cut Resistant / Chemical Resistant Gloves

STAINLESS STEEL MESH GLOVES

- This double interlocked metal mesh ambidextrous glove is formed using state-of-the-art micro plasma welding techniques. The result is stronger, smoother, hermetically sealed ring connections that have no gaps or weak spots
- The self-adjusting tensioning system allows for easy fit with no straps or buckles to fasten; there is no fabric cuff to wear out or become contaminated, the glove is easy to clean
- Meets ANSI/ISEA standard 105 Level 5 for cut resistance
- Case Qty: 1
- Sold per glove

Micro plasma weld

Resistance weld

Micro plasma welds create value. Links are stronger so the gloves wear longer. There is also a lower risk of contamination because, unlike resistance-welded mesh rings, micro plasma welded rings leave no gaps to trap soil.

THE ABC'S OF FALL PROTECTION

A typical Person Fall Arrest System (PFAS) incorporates three components, often described as the ABC's of fall protection. The anchorage connector, body support, and connecting device, when used together, form a complete system for maximum worker protection. But don't forget about another required component of any fall protection program – descent, rescue, and retrieval of a fallen worker.

Anchorage is a secure point of attachment. They must be able to hold fast under more than a ton of force generated in a fall.

Body support harnesses distribute fall forces over the upper thighs, pelvis, chest, and shoulders. They provide a connection point on the worker for the PFAS.

Connectors such as shock absorbing lanyards or self retracting lifelines connect a workers harness to the anchorage.

Descent and rescue devices are used to retrieve an injured worker or lower him to the ground.

FULL BODY HARNESS APPLICATIONS

CSA STANDARD Z259.10-06 DIVIDES HARNESES IN TO 5 CLASSES:

CLASS A PERSONAL FALL ARREST

Class A full body harnesses are designed to support the body during and after the arrest of a fall.

CLASS D SUSPENSION & CONTROLLED DESCENT

Class D full body harnesses are designed for suspension or controlled descent from a height.

CLASS E LIMITED ACCESS (EVACUATION)

Class E full body harnesses are designed to support a worker in a position that reduces the worker's profile during passage through a limited access area.

CLASS L (LADDER) LADDER CLIMBING

Class L full body harnesses are designed for use with fall restrict systems involving the use of a fall arrester that travels on a vertical lifeline or rail.

CLASS P WORK POSITIONING

Class P full body harnesses are designed to position a worker during a work operation.

MILLER® REVOLUTION™ ARC-RATED HARNESSSES

Designed to protect workers from falls caused by electric arc-flash and arc-blast exposure when working at heights or in confined space applications near energized electrical sources.

- Features the same key elements as the Miller® Revolution Harness (see page 230)
- Kevlar®/Nomex® Miller® DualTech™ webbing - patent-pending 10000 lb. tensile strength webbing is engineered with permanent fire retardant (FR) properties.
- Webbing offers the durability and FR properties of Kevlar® on the outer side, with softer FR Nomex® on the inside of the webbing for greater comfort
- Webbing assures arc protection and durability that eclipses any nylon webbing
- PivotLink™ design allows unmatched freedom of motion and comfort, while the unique cam buckles provide easy two-finger adjustment
- Leather insulators under all metal hardware offer additional protection for the worker
- Kevlar® web loop on the back pad allows for a "metal-less" connection when used with a Kevlar® shock-absorbing lanyard with a choke-off loop
- All Miller® Revolution™ arc-rated harnesses have bright red binding on every pad, making them easily identifiable as an arc-rated product
- Meets stringent ASTM F887-05 arc-flash standards
- Certified to CSA standard Z259.10-06

Fall Protection

RITE-ON™ HARNESSSES

Designed with two things in mind: Simplicity and Comfort. It's constructed to shape around the user with ease. The harnesses are engineered with a lumbar support to make the donning of a harness a breeze. The comfort pad also eliminates the tangling of the straps which are common with traditional harnesses. The bayonet style connectors allow users to connect their chest and legs straps in a single action.

RITE-ON™ HARNESSSES

- Integrated back and shoulder pad – Conforms to the wearers' shape to provide all-day comfort
- Fast-action bayonet style connectors – Allow quick and easy donning
- Extended D-ring option – Makes lanyard connection easier and safer
- Sweat wicking pad fabric – Keeps wearers comfortable in hot conditions
- Tangle-free pad design – Harness keeps its shape between use, aiding quick and easy donning
- Lightweight polyester webbing – Offers superior UV and chemical resistance
- Universal size with full adjustability – One size fits most
- Certified to CSA standard Z259.10-06

RITE-ON™ II HARNESSSES

- Designed for more simplicity and comfort, this series is constructed to shape around the user with ease
- Open cell foam padding wicks sweat away from the body, keeping workers cool and dry throughout the day, and improving productivity
- Integral back and shoulder pad eliminates tangling of the harness's straps
- Lumbar pad decreases back injuries
- Removable 11" comfort leg pad reduces of pinch point and strain while in work position
- Quick-connect buckles allow easy, single action secure connection
- Protective label pouch makes identification and inspection easier
- Fall arrest indicator makes it easier for a worker to identify if a large load has been applied to the harness
- Certified to CSA standard Z259.10-06
