**SQUINCHER**  
THE DRINK OF INDUSTRY

## SQWINCHER® VERSUS WATER

- While water can quench mouth thirst, it cannot immediately restore body thirst
- Dehydration depletes muscle cells of electrolytes, important minerals and body fluids, which weakens the cells and keeps them from functioning normally
- Water is absorbed slowly from the stomach and cannot be retained in the extra-cellular cavity where dehydration has occurred
- *Sqwincher*® is isotonicly formulated to begin working 98% faster than pure water and restores electrolytes to the muscle cells within seconds of drinking. In the process, energy levels are restored
