CLASS A, GROUND FAULT CIRCUIT INTERRUPTERS

Class A, GFCI, by standards definition, must trip the circuit if a ground fault occurs with a maximum of 6 mA of current loss to ground. If a ground fault is sensed, a Class A GFCI will trip in less than 25 ms, protecting you and your workers.

Rule 76-016 of the Canadian Electrical Code (2006 & 2009) states that, on demolition and construction projects, all 15 A and 20 A temporary receptacles (e.g. extension cords) MUST be protected with a Class A type GFCI.

Many provinces also require that ALL receptacles used to power portable tools and equipment MUST be protected with a Class A GFCI.

Certified for sale in Canada by an accredited certification body.

COMMERCIAL LAMINATED LOCKS

- Greater strength against attacks than competitive alternatives
- Laminated steel body for superior strength
- Hardened steel and boron alloy shackles for extra cut resistance
- Multiple layered steel plates with countersunk rivets repel attacks on the lock body
- Hardened steel bottom plate with hourglass-shaped keyhole opening protects against drills and plug-pullers
- Superior cylinder-and-key protection versus off-brand substitutes
- Cylinder design and production results in a greater range of unique cylinder-and-key cuts
- Cover all edges, preventing scratches to paint and finished surfaces
- Includes 2 keys

KEYED DIFFERENT vs. KEYED ALIKE

Each keyed different lock has a unique key for higher security. Keyed alike locks have the same key for each lock. Keyed alike locks add an extra convenience where many locks are involved. Extra locks can be ordered later to fit the same key number.

SEAL TIGHT™ BALL VALVE LOCKOUTS

- Compact, lightweight, flexible and easy to use, the Seal Tight™ valve lockout works on virtually every valve size and applications
- Eliminates the risk of accidentally moving a handle by removing it and concealing the stem
- Effectively locks out all valves from 3/8" to 4", thus eliminating specific valve lockout systems
- Simple to apply, with an intuitive wrapping strap and locking mechanism
- Works on virtually all valves; metal and PVC, insulated pipes, ceiling or wall-mounted pipes and hard to reach valves
- Made of PVC polyester fabric and HDPE plastic, it withstands corrosive environments and operates in temperatures from -40°F to 300°F
